

Astor Sconce

Design Firm

AvroKO

Country Of Origin

Canada

Description

The Astor Sconce is part of the Brightliner collection, which draws its inspiration from NYC's iconic subway cars aiming to transport visitors in a functional yet sophisticated way. Harkening back to NYC's most elegant eras, the items in the Brightliner collection feature iconic silhouettes and sleek curves. With nods to Manhattan's vibrant energy, each piece embodies a unique sense of thrill.

The Astor Sconce is a classic round form comprised of two types of cast glass with a portal-style metal trim detail. The outer ring is milk glass and the inner disc is a textured translucent clear glass. All elements of the fixture glow. The inner ring is held in place with decorative brass ring. The fixture has a prismatic diffuser with an internal LED component and the glass is available in two finishes.

Materials Shown

Opal Glass, Plated Antique Brass
